Hello there 🖐,
my name is Quazi Yasin Billah!

Two of my biggest passions are art and technology. My main goal is to create graphics / visuals that make people feel something. I like being out of comfort zone, learning from my mistakes, and using all my experiences to improve my work. I call myself a graphic designer but I don't let that limit me in the things that I can do. I'm passionate about making things that look beautiful and serve a purpose.
